- Up to 6 times longer duration than a standard cat litter
- Delicate Lavender fragrance

HAIR: LH - SH

Packages 10kg

Super-clumping litter consisting of a refined natural bentonite in fine granules of white color. The particular fine particle size of the granules, dust-free, allows to form small and compact balls collecting much more fast liquids and to be disposed more easily. Moreover, when the granules come into contact with the excrement of your little friend, the litter releases a fresh scent of lavender. So the litter lasts fresh and clean for a longer time, favoring the saving of its use.

Particle size (mm)	Absorption time	Water absorption (Westinghouse)	Dust	Odour reduction
0,6 - 2,25	2 seconds	190 % - 300 %	< 1 %	> 93 %
